PROFESSIONAL SUMMARY

Frontend Developer with a background in corporate operations, specializing in building responsive web applications using React, Vite, and Tailwind CSS. Experienced in engineering user-centric workflows and secure administrative platforms. Eager to bring strong frontend skills to a collaborative team while actively scaling into long-term goals in cloud infrastructure.

EDUCATION

High School Diploma

Harding Senior High School

2017

St. Paul, MN

Junior Front End Certificate

2025-2026

SheCodes Front End Development Bootcamp

WORK EXPERIENCE

Receptionist

May 2024 – Present

JLL - 3M Client

St. Paul, MN

- Managed corporate invoicing and inventory management pipelines, identifying and resolving operational workflow bottlenecks.
- Maintained high-precision data logs across internal software platforms to ensure data integrity and documentation accuracy.

UI/UX Researcher & Web Developer

May 2025 – Feb 2026

Non-Profit Organization (Volunteer)

St. Paul, MN

- Partnered directly with the non-profit CEO to convert fragmented layout structures into a unified, accessible online web strategy via Wix.
- Audited interface components and conducted user behavioral research to optimize digital intake and donation pathways.

UI Researcher

2025 – 2026

Norway Health Center (Contract)

St. Paul, MN

- Executed visual design audits on unorganized legacy web layouts to establish a cohesive, responsive web presentation via Wix.
- Collaborated with executive stakeholders to align target business objectives with mobile and cross-browser scalability.

PROJECTS

Volunteer Intake & Admin Management Application | React, Vite, Tailwind CSS, Git

- Engineered a dual-sided resource platform featuring a public-facing intake pipeline for scheduling alongside a secure administrative portal.
- Built protected dashboard interfaces allowing administrative coordinators to create, update, real-time track, and modify database shifts.
- Optimized application state management and data lifecycle fetching logic to maintain responsive, high-performance rendering.

Auto Shop Tracker | React, Vite, Tailwind CSS, JavaScript

- Developed a dynamic vehicle service management application designed to track real-time automotive workshop statuses (e.g., tinting, wrapping).
- Implemented clean client-side state tracking and interactive workflows to streamline updates for technicians and vehicle owners.
- Architected a modular component hierarchy to ensure scalable code maintenance and fluid user navigation.

TECHNICAL SKILLS

Languages | JavaScript (ES6+), HTML5, CSS3

Frameworks | React, Vite, Tailwind CSS

Developer Tools | Git, GitHub, Vercel, Wix Editor, VS Code
